

FoodAssist AI Quick Reference Guide

FoodAssist AI Quick Reference Guide

This guide summarizes the most common FoodAssist AI food delivery support topics.

ORDERS: Track your order under the Orders tab (Confirmed > Preparing > Picked up > On the way > Delivered). For missing or wrong items, use Get help > Report an issue. Cancel free only before the restaurant starts preparing the order.

DELIVERY: Times are estimates and vary with prep time, traffic, and weather. Message your courier in-app once the order is picked up. If marked delivered but not received, report it under Get help > Order never arrived and we review the courier GPS drop-off.

PAYMENTS: We accept cards, Apple Pay, Google Pay, and gift cards. A temporary authorization hold may appear and clears within a few days. Refunds go to FoodAssist AI credit (instant) or your card (3-5 business days). Declined? Update your card under Account > Payment.

MEMBERSHIP: FoodAssist Plus is \$9.99/month for free delivery on orders over \$15. Cancel anytime under Account > FoodAssist Plus; benefits last until the end of the billing period.

SUPPORT: For issues the docs do not cover, the Synapse AI agent will connect you to a human support agent with full context.
